

MAGICSOFT-SYSTRAN PARTNERSHIP

In 2018, Magicsoft Asia formed a partnership with SYSTRAN, a pioneer and global leader in translation solutions, to provide the latest advancements in machine translation to the markets of South East Asia, China and South America. These include countries like Singapore, Indonesia, Malaysia, Hong Kong and Macau, Chile, Brazil, Columbia, etc.

With two decades of experience in systems development, Magicsoft is able to help organizations enhance multilingual communication and increase productivity using SYSTRAN's real-time language solutions for internal collaboration, search, eDiscovery, content management, online customer support and e-Commerce.

Through the use of SYSTRAN's rich Application Programming Interface (API), Magicsoft can help clients perform integration with their existing translation systems to further develop their collaboration tools in a secure environment. And with SYSTRAN's AI-powered Neural Machine Translation, including text-to-speech/speech-to-text tools, you can deliver real-time multi-lingual human-to-human as well as human-to-machines voice and text collaborations. This means you can translate in real-time any streams of text (chat, message, etc.) or speech (voice or phone communication).

- Translate emergency broadcasts into various foreign languages in real-time.

- Get private documents and texts translated without using public translation tools.

- Reduce the time required to translate large amounts of documents into various languages.

Improve your international collaboration with a centralized and secure translation server keeping all your sensitive information from leaving your company and providing accurate translations tailored to your brand, technical and specific terminology.
